

# Mobile Mac-Microdos Drum Filling Unit

With pneumatic compactor (available in ATEX approved:  II 2G/D)

For filling and compacting of poor flow properties to good (bursting) powder.

- There is no mechanical force imposed on the powder, like by dosing-screw conveyors (separating components, clumps, friction).
- Dosing-Valve contamination-free activated
- Quick dismantling, easy to clean
- low built
- revolutionary filling technique

## Filling techniques:

- Bag in Box, drum-bag filling, continuous liner
- Container, Big-Bag-filling,- emptying
- Charging, dosing of smallest-, large quantities
- Microdosing, laboratory automation, robotic
- Special application machines, glovebox, isolator, weighing technology
